Subject: Microsoft Settlement

I was told this email box is dedicated to soliciting the public's opinion on the settlement for the Microsoft Anti-Trust lawsuit. If that is true, I would like to offer this:

If Microsoft is guilty of using monopolistic practices to promote their products and their OS, they should be required to develop their product suite (including development languages) on three alternate platforms (OS's) for the next ten years.

If this mailbox is for some other purpose, please excuse the interruption.
